

Canada Intervention – Item 4b - Update on the progress achieved through the COVID-19 Vaccine Delivery Partnership

Thank you for giving me the floor.

Canada commends Mr. Chaiban and his team across the COVID-19 Vaccine Delivery Partnership for the important role they have played in increasing vaccine roll out across the 34 focus countries.

We recognize that progress has been made, and that for those countries with humanitarian contexts, the last mile support will continue to be vital through 2022 and into 2023.

We would be grateful for more information from Mr. Chaiban on how the COVDP will be working with humanitarian partners and the Humanitarian Buffer to ensure that COVID-19 vaccination is bundled with essential health services to incentivise and increase vaccination rates?
