Nigeria
Education

What do we want to change?

1 in **4** children

73% of children aged 7 to 14 years do not demonstrate foundational reading skills

Only **39%** of the poorest girls attend primary school

Only **41%** of primary students remain in school by the end of junior secondary education

What are our priorities?

Improve school readiness for children 3 to 5 years

Increase access to learning opportunities especially for poor children, children living in rural areas and for girls

Enhance foundational learning and relevant skills development

Promote and track transition to secondary education, especially for adolescent girls

What are we doing?

Improving access to education through cash transfers, enrolment drives and community engagement

Scaling interventions on foundational literacy and numeracy

Expanding access to high-quality early childhood education

Improving the quality of teaching through continuous professional development

Supporting access to multiple (including remote) learning pathways

Developing adolescents' transferable, job-specific and digital skills

Ensuring safe and conducive learning environments for all children

Strengthening the education system by improving planning, financing and monitoring

What have we accomplished?

4.2 million children in humanitarian situations accessed formal or non-formal basic education

A digital learning platform, Nigeria Learning Passport developed with **15,000** curriculum mapped materials

**1.1 million** children benefited from psychosocial support in schools

5.6 million children received learning materials

170,000 primary teachers supported with strengthened capacities for quality education

Digitalised education and management information systems **(EMIS & TMIS)**

What do we need?

Advocate for increased volume, efficiency, equity and transparency in education financing

Scale effective models on girls' primary school access, and build models on retention and transition

Public investment in and coordinated efforts on implementing and monitoring safe school commitments

Roll out effective foundational literacy and numeracy approaches in formal schools and non-formal learning centers

Scale-up transferable, job-specific and digital skills programming for adolescents

Public-private partnerships to expand access to connectivity, data and devices for digital learning
